treadmills, friction burn injuries of children, 201
Burn scar carcinoma, management of, Marjolin's ulcer, 241
Burn surgeons
critical shortage of (editorial), 463

headed for a shortage of, 464
Burn therapists, facial burns, management of, 513
Burn trauma, splinting and positioning programs for, contractures prevention, 54
Burn units
hot cooking oil burns, clinical details and common patterns study of, 205
pediatric, airway and ventilator management, 435
Burns, fatal, victims of dowry deaths in India, 165

Calciphylaxis, vacuum-assisted closure use in, 161
Calcium gluconate, carotid artery infusion of, hydrofluoride acid burn treatment, 421
Cannabis oil, manufacturing of, burns sustained while, 314
Carotid artery infusion, calcium gluconate treatment, hydrofluoric acid burn to face, 421
Chemical burns
airbag deployment in automobile crashes, 357
foot, complex regional pain syndrome complications, 189
Children
acutely ill, complications, haloperidol use, 472
burn injuries, psychological problems in young adults after, 98
burn survivors attending summer camp, locus of control and social competence of, 349
burn units, airway and ventilator management strategies, 435
campfire burn injuries, nationwide campaign for prevention, 124
contact burns, gas fireplace, 510
contact palm burns, glass enclosed fireplaces, 67
fire safety, trained dogs and, 197
firesetters, Burn Education Awareness programs for, 324
high-risk behavior for burn injury, Saturday-morning television, 381
hot beverage scalds, severity of injuries, 224
knee ulcers, 128, 129
major burns, jejunojejunal intussusception, feeding intolerance, 212
milk bottle burns in infants, 461
protracted mechanical ventilation, long-term intubation for, 262
sandal burn treatment, 501
scald burns, assessment of effectiveness of clinical pathways for, 256
scald burns with grease, case-study, 374
scald injuries in, grease fryers, 456
severe burn injury, developing small-bowel intussusception, 211
thermal injuries, pulmonary function in, 287
treadmills
burn risk to, 201
friction injuries, 441
Collagen deposition, excessive, keloid and hypertropic scarring, 1
Cytokines, wound healing process, dysregulation in growth factor expression and, 149

Diathermy, surgical, burn complications of, 120
Disaster management, burn care, planning and preparation for, 45
Dowry deaths, young wives burned in India, 165
Drug administration, toxic epidermal necrolysis related to, 81

Elderly, burn prevention campaign for, 445
Electrical burns
high-voltage
early-onset unilateral cataracts, 363
quality of life after, 61
low and high voltage, 20-year review of, 479
Energy expenditure, appetite and, diurnal pattern loss after injury, 491

Facial burns
physical management of, 513
rehabilitation trends, survey of, 514
Fire, juvenile firesetters, community-based treatment program, 324
Fire escape, behavioral science to improve, 179
Fire safety
children, trained dogs teaching, 197
Saturday-morning television, high-risk behavior for burn injury, 381
Firefighters, burn injuries, 10-year longitudinal study of, 430
Fireplaces
contact burns in young children, 510
glass enclosed, palm burns in toddlers, 67
Foot contracture, postburn subtalar dislocation in, 319
Friction injuries, children and, moving treadmills, 441
Function, burned hand
assessment after injuries, 134
intensive management to regain, 67

Haloperidol, sedation and agitation control of pediatric patients, 472
Hand and wrist, postburn contractures of the, 416
Hands
function assessment, burn injury, 134
hot press injury, free serratus anterior muscle slips for reconstruction, 346
Health status, personality characteristics and, patients with burn injuries, 228
Hydrofluoric acid, burn injury from, treatment to the face for, 421

Immunoglobulin therapy, Fas ligand signaling blocking and, 81
Infection, control, third-world countries, 500
Insulin-like growth factor-I, effects on dexamethasone-induced protein degradation, cultured myotubes, 112

Intravenous fluid resuscitation, milk bottle burns in infants, 461
Intravenous immunoglobulin, toxic epidermal necrolysis outcome and, 246

Joshi External Stabilizing System, postburn contractures of hand and wrist, 416

Leptin, burn injuries, appetite/energy expenditure after, 491
Lightening strikes, 20-year review of injuries from, 479
Lung function, impaired, chest wall scarring in children, 287

Methamphetamine burns, injuries in a rural burn center, 425
Myotubes, cultured, protein degradation, dexamethasone-induced, 112

Neck, rehabilitation trends, survey of, 514
Neonates, severe burn injuries, management of, 219
Neurological impairments, early-onset, burn injury in patients with, 107
Nursing Forum, nursing shortage, burn unit survey, 215
Nutrition Forum, burned toddler, small-bowel intussusception in, 211

OT/PT Forum
burn therapists, rehabilitation for head and neck burns, 513
postburn recalcitrant knee ulcers, pediatric patients, 128

Pain management
burn patients, music relaxation, 8
chemical burns to the foot, 189
transcutaneous electrical nerve stimulation, pruritus in burn survivors, 236
Postburn contractures, hand and wrist, Joshi External Stabilizing System for, 416
Posttraumatic stress disorder, high incidence of, electrical injury patients, 61
Presidential Address, 15
Pressure sores
evaluation of care for, 387 (editorial)
prevention of, evidence-based practice for, 388
Procalcitonin, pediatric burn patients, early indicator of sepsis, 76
Protein degradation, dexamethasone-induced, IGF-I blocking of, 112
Pruritus, burn, extremity burn wounds, transcutaneous electrical nerve stimulation for, 236
Psychological issues
social competence and locus of control, pediatric burn survivors, 349
young adult pediatric burn survivors, 98
Psychosocial Forum, adolescent burn survivors, burn camp experience, 140

Pulse oximeters, patient oxygenation monitoring using, 411

Quality of life
burn pruritus, pain management for, 236
electrical *vs.* thermal injuries, 61
young adults burned as children, disfigurement and disabilities of, 98

Rehabilitation
development of muscle perforator flaps for, 366
digital photography, communication tool for therapists and nurses, 54
music relaxation during, 8
trends for, head and neck burn injuries, 514
Resuscitation, burn shock, ultraprecise, metabolic monitoring in vascular beds and, 33

Scald burn
car radiator fluid, 452
children and grease fryers, 456
clinical pathways, evaluation of, 256
hot beverage, Australian children and, 224
kitchen grease, causes and treatment of, 374
warming milk bottle, 461
workplace accidents and injuries, 328
Scars
burn
adolescent, body image of, 141
anterior knee, management of, 129
burn survivors, body esteem of, 25
keloid, treatment of, combination of surgery and intralesional verapamil injection, 1
Sedation, pediatric burn patients, haloperidol use to induce, 472
Sentinel lymph node biopsy, identification of occult nodal metastases, 241
Sepsis, pediatric burn patients, morbidity and mortality, 76
Skin, underlying tissues, sandal burns, 501
Skin grafting
children, gas fireplace contact burns, 510
full-thickness skin loss, pronator quadratus flap, 519
hot cooking oil burns and, 205
massive burns, treatment for, cultured skin substitutes, 337
Sleep disorders, burn injured patients and, 294
Smoke alarms, effectiveness limited by behavior, 179
Splinting, influencing scar remodeling, 54
Stress, thermal injury induced, pituitary release of various hormones, 306
Surgery
burn reconstruction, muscle perforator flaps for, 366
cataract, high-voltage electrical injury, 363
diathermy, complications of, 120
distal volar forearm, full-thickness skin loss of, 519
hot-press hand injury, free serratus anterior muscle flap reconstruction, 346

Tar, melted, thermal injuries caused by, 506
Telemedicine, burn follow-up, 485
Temperature threshold, oximeter safety study for burn injury, 411
Thermal injuries
airbag deployment, frontal automobile crashes, 357
children, airway management patterns in, 435
children with, impaired spirometry pulmonary function and, 287
foot contracture, postburn subtalar dislocation, 319
melted tar, removing of, 506
muscle perforator flaps for reconstruction, 366
oxidative erythrocyte damage in, 171
partial-thickness, microbial contamination, 192
Toxic epidermal necrolysis
immunoglobulin, differences in, 81
intravenous immunoglobulin, therapy for, 246
Translaryngeal intubation, prolonged airway access for children, 262
Treadmills, friction injuries in children, 441

Ulcers, knee, weight-bearing and ambulatory demands on, 129

Vascular beds, real-time metabolic monitoring of, 33
Verapamil, injections for the treatment of keloids, 1

Workers compensation, occupational burn injuries, 328
Wound care
glycosaminoglycan hydrogels as supplemental dressings in, 276
keratinocyte delivery and, 266
silver-containing Hydrofiber® dressing, microbicidal properties of, 192
Wound closure, massive burns, cultured skin substitutes for, 337
Wound healing
calciphylaxis-induced, vacuum-assisted closures, 161
cytokines and anticytokine therapy for, 149
